

Heidi - From Urgent Needs to a Success Story!

Written by Bob and Linda

In June 2010, Heidi was left in an overnight drop box in shelter near Raleigh, NC. She had no name and no history. Two days before she was set to be euthanized, Heidi was sprung for American Fox Terrier Rescue !

Heidi was driven to Maryland and went immediately to Linda and Bob's. She was covered with infected tick bites and a number of live ticks, and was clearly in need of dental work. She also had 6 mammary tumors which were later, thankfully, found to be benign.

Linda and Bob fostered her, helping her navigate medical treatment and surgery, and letting her know that she finally had someone in her life that would never let her down. After all the love and care they put into her, they didn't think they could part with her, so they asked to adopt her. Heidi agreed that this was where she wanted to stay, and a new family was formed.
